Further information:

Since 2008 TITAN and ArcticStore have been introducing new 40' HiCube reefer containers into the rental fleet.

There are 2 types of flooring:

- The traditional T-section (also referred to as T-bar).
- New design hollow floor, which gives an effective flat floor ideal for pallet lifters & wheeled storage cages whilst maintaining circulation and user safety.

The containers are fitted with new technology refrigeration machines. To date all feature TK Magnum machines offering set points from -35C to +30C and power savings of up to 75% (at -25C) when compared with more typical refrigeration machines operating in the hire market. 380/440V - 3 Phase - 32A.

You will find more information on this and the many other container types together with details of all the services available by following the links below.
